

**Proceedings of the
23rd International Workshop on
Intelligent Computing in
Engineering**

EG-ICE 2016

29 June – 1 July
Kraków, Poland

Sponsored by
KNOW (Leading National Research Centre) Program

Edited by
Grażyna Ślusarczyk, Barbara Strug, Pieter de Wilde

Papers of these proceedings were presented during the 23rd EG-ICE workshop held between 29th June and 1st July 2016, at the Faculty of Physics, Astronomy and Applied Computer Science of the Jagiellonian University, Kraków, Poland

Note that only the offline proceedings (on the USB flash drive) contain links to the full papers

Overview

ID	Title	Authors
1	BIMsite – Towards a BIM-based Creation and Evaluation of Realization Variants Comprising Construction Methods, Site Layouts and Schedules (pp. 1-10)	Stefan Krepp, Katrin Jahr, Sonja Bigontina, Maximilian Bügler and André Borrmann
2	A review of approaches to automated building energy performance simulation (pp. 11-20)	Aurelien Bres and Georg Suter
3	Impact of occupancy on energy consumption of an educational facility: the Roland Levinsky Building (pp. 21-30)	Michele Rossoni, Martina Amore, Marco Marengo and Pieter de Wilde
4	Personal/Team, Engineering Knowledge Modelling in Context of Product Development Stage (pp. 31-42)	Jerzy Pokojski
7	Shape control for self-stress following deployment of a tensegrity footbridge (pp. 43-52)	Ann C. Sychterz and Ian F.C. Smith
11	Cooperative design methods for energetically active façade elements based on BIMserver and multi-agent services (pp. 55-64)	Anna Wagner and Uwe Rüppel
12	Hypergraphs and Extremal Optimization in 3D IC Design Automation (pp. 65-73)	Katarzyna Grzesiak-Kopeć, Piotr Oramus and Maciej Ogorzałek
13	How to predict behavior at risk – Educational Game Story Analysis Using Layered Graphs and Eye-tracking System (pp. 75-84)	Iwona Grabska-Gradzińska
14	Knowledge based Bridge Engineering - Artificial Intelligence meets Building Information Modelling (pp. 85-94)	Dominic Singer, Maximilian Bügler and André Borrmann
15	A Graph Transformation Based Method for the Semi-Automatic Generation of Parametric Models of Shield Tunnels (pp. 95-104)	Simon Vilgertshofer and André Borrmann
16	Geometric correct objects and systems with a predictable and traceable behavior (pp. 105-113)	Jakob Kirchner, Wolfgang Huhnt, Thomas Gust and Konrad Polthier
17	A Next Generation Platform for Building Energy Modeling Based on Smart Metering Data, Point Cloud Scans, GIS and Building Typology (pp. 115-124)	Robert Irmeler, Christian Eller and Uwe Rüppel

ID	Title	Authors
18	Incorporating knowledge on construction methods into automated progress monitoring techniques (pp. 125-135)	Alex Braun, Sebastian Tuttas, Uwe Stilla and André Borrmann
20	Augmented reality supported work instructions for onsite facility maintenance (pp. 137-146)	Matthias Neges and Christian Koch
21	Nonlinear sensor fault diagnosis in wireless sensor networks using structural response data (pp. 147-156)	Kosmas Dragos, Katrin Jahr and Kay Smarsly
22	Smart Sensor Based Real Time Monitoring for Prediction and Prevention of Coastal Dike Failure (pp. 157-167)	Ralf Becker, Stefan Herle and Jörg Blankenbach
23	Mobile Augmented Reality Implementation for Structural Analysis (pp. 169-178)	Yelda Turkan, Aliye Karabulut-Ilgu, Rafael Radkowski, An Chen, Amir H. Behzadan and Charles Jahren
24	Auto-detection and assignment of unexpected tasks in Embedded Systems design process (pp. 179-188)	Adam Górski and Maciej Ogorzałek
25	Enhanced Differencing and Merging of IFC Data by Processing Spatial, Semantic and Relational Model Aspects (pp. 189-198)	Simon Daum and André Borrmann
26	A CA-based Crowd Model for the Generation of Alternative Evacuation Routes in case of Hazardous Circumstances (pp. 199-208)	Isaac Koumis, Ioakeim Georgoudas, Jaroslaw Waş and Georgios Ch. Sirakoulis
27	A geometrical Description of a Motion Sensor in a Building Model for Identifying Construction Site Activities (pp. 209-216)	Michael Kluge and Wolfgang Huhnt
28	Image-based Window Detection – An Overview (pp. 217-225)	Marcel Neuhausen, Christian Koch and Markus König
29	Simplifying Building Energy Performance Models to support an Integrated Design workflow (pp. 227-237)	Sundaravelpandian Singaravel and Philipp Geyer
30	Multi-agent reinforcement learning for optimizing technology deployment in distributed multi-energy systems (pp. 239-250)	Lynn Andrew Bollinger and Ralph Evins

ID	Title	Authors
31	Semantic Enrichment and Multimodel Data Exchange Approach for CFD Analysis of Bridges (pp. 251-259)	Ali Ismail, Yaseen Srewil, Tobias Mansperger and Raimar Scherer
33	Data driven method of pedestrian flow estimation for evacuation scenario using queuing model (pp. 261-270)	Jakub Porzycki, Pavel Hrabák, Marek Bukáček, Jaroslaw Wąs and Robert Lubaś
34	Towards Model Constraint Representation Using Linked Data (pp. 271-279)	Chi Zhang and Jakob Beetz
37	Super-Structure and Super-Structure Free Design Search Space Representations for a Building Spatial Design in Multi-Disciplinary Building Optimisation (pp. 281-290)	Sjonnie S. Boonstra, Koen K. van der Blom, Hérm H. Hofmeyer, Robert R. Amor and Michael M.T.M. Emmerich
38	From Analysis of Information Needs towards an Information Model of Railway Infrastructure (pp. 291-300)	Zaharah Allah Bukhsh, Timo Hartmann and Irina Stipanovic
39	Knowledge-Based Building Navigation Tools with the Use of a Hierarchical Graph Model (pp. 301-311)	Wojciech Palacz, Grażyna Ślusarczyk, Andrzej Łachwa, Barbara Strug, Anna Paszyńska and Ewa Grabska
